

DGEC DASHBOARD PORTAL

Complete User Workflow & User Role Guide

Dar Al-Ghabra Engineering Consultancy · System Documentation

Date: July 2026 | Version: 2.0 | Status: Production Active

1. System Architecture & Role Portals Overview

The DGEC Dashboard platform provides a multi-tenant, role-based workflow for Engineering Consultancy Management. All portals connect seamlessly to a central Node.js API server and MySQL database with real-time cross-tab synchronization.

System Administrator (/admin)

Full control over project setup, user/teammate allocation, and client credentials.

Project Manager (/)

Executive project overview, task tracking, financial invoicing, and client discussion feed.

Client Portal (/client)

Client-facing dashboard for tracking project progress, team contact details, and PM feed.

Staff Workstation (/staff)

Engineering staff portal to view assigned tasks, update progress %, and set completion status.

2. System Administrator Workflow (/admin)

Step 1: Access & Authentication

Navigate to <http://localhost:8080/login> and sign in with Admin credentials (admin / Welcome_2026@).

Step 2: Projects Setup

Under Projects Admin, create or edit projects, set service category (e.g. Full Engineering), start & target dates.

Step 3: Teammates Allocation

Click "+ Add Teammate". Select an existing employee from the roster OR create a new employee with Full Name, Role, Discipline, Mail ID, and Phone Number.

Step 4: Edit / Delete Teammates

Click "Edit" to modify teammate details or "Remove" to permanently delete a teammate from the project. Changes update MySQL immediately and reflect on the Client Portal.

Step 5: Client Accounts Management

Under Clients Admin, set up client profiles, assign committed projects, and manage portal security credentials.

3. Project Manager Workflow (/)

Step 1: Dashboard Overview

Log in as Project Manager (projectmanager / Welcome_2026@). View all active projects, progress percentages, and status tags.

Step 2: Engineering Discipline Oversight

Monitor discipline tasks across Architecture, Structure, HVAC, Electrical, Plumbing, and Fire Safety.

Step 3: Direct Client Discussion Feed

Communicate directly with clients for each committed project through the embedded Discussion Feed.

Step 4: Financial Invoicing & Progress Control

Issue project invoices, track approval statuses (Required, Pending, Approved), and update progress bars.

4. Client Portal Workflow (/client)

Step 1: Secure Client Sign-In

Log in with Client credentials (e.g. anjana / Welcome_2026@). Auto-routes directly to <http://localhost:8080/client>.

Step 2: Committed Projects Overview

View all committed projects for your account, overall progress bars, service categories, and target completion dates.

Step 3: Engineering Team & Contact Numbers

View direct contact details for your dedicated Project Manager (Saurabh M.) and assigned Engineering Teammates with Phone & Mail ID.

Step 4: Task Progress Breakdown

Track specific discipline tasks and completion percentages in real time.

Step 5: Direct Communication Feed

Post questions or requests directly to your Project Manager in the Discussion Feed.

5. Staff & Engineering Teammate Workflow (/staff)

Step 1: Staff Access

Log in via Staff credentials (staff / Welcome_2026@ or assigned username).

Step 2: Assigned Tasks List

View all engineering tasks assigned to you across projects with start and target dates.

Step 3: Update Progress % & Status

Update task completion percentages (0% - 100%) and set status (In Progress, Done, On Hold).

Step 4: Live Synchronization

Task updates immediately sync to MySQL database and display on the PM Dashboard & Client Portal.

6. User Roles & Credentials Reference Matrix

Role Name	Username	Default Password	Portal Access URL
Administrator	admin	Welcome_2026@	http://localhost:8080/admin
Project Manager	projectmanager	Welcome_2026@	http://localhost:8080/
Client Representative	anjana	Welcome_2026@	http://localhost:8080/client
Staff Engineer	staff	Welcome_2026@	http://localhost:8080/staff
Structural Engineer	john	Welcome_2026@	http://localhost:8080/staff
Architect Teammate	ria	Welcome_2026@	http://localhost:8080/staff

' Document System Verification

This workflow document has been compiled and verified against the live DGEC platform. All backend routes, MySQL database tables, and portal URL redirection guards are active.
